

Ino Coin Platform rules:

1. When are projects financed? – every 6 months our team of experts, together with our community, will decide which project has the highest potential of success and return on investment in the future.

2. How is financing used? - 100% of the Ino Coin are delivered as soon as a project is selected and approved, however the Ino Coin shall be used gradually over 18 months as per a detailed plan of how the idea will be brought to reality. The reasoning for this is avoidance of the large market fluctuations, which would be caused by a sale of all the Ino Coin funding at once by the leaders of the selected project. The Ino Coin team reserves the right to end financing and request a return of investment funds, if there is a clear lack of progress in a given project.

3. How is financing determined? – Financing is determined 60% by Ino Coin platform user votes and 40% by Ino Coin's investment managers.

4. Who can vote? – Each Ino Coin user can vote once per project for an unlimited number of projects. Each vote is free of charge, however if abuse of the system is detected all suspected accounts will be blocked until legitimate voting results are restored.

5. What types of projects can be submitted to the platform for financing? – Any innovative project, which can bring something new and revolutionary to a given sector or industry is welcome for submission. As long as it is fully legal and has little to no significant negative effects on society.

6. How is financing completed? – Startup projects are financed entirely in Ino Coin, delivered to the projects designated crypto currency wallet.

7. Conditions of financing Ino Projects – When a project is selected for funding, representatives of the project will meet with the Ino Coin team and the conditions of financing will be worked out.

8. How does Ino Coin benefit? – Ino Coin benefits from a project which has been completed and successfully brought to market. Ino Coin's share of the startup's profits is agreed upon with the leaders of each project at the beginning of the venture.

9. Ino Coin team's involvement – The Ino Coin team will be actively involved in the management of each project and all project decisions must be agreed upon with the Ino Team.
